Comeback of an icon: Beduin Scandinavia - new flagship of the Dethleffs fleet

Caravan series for highest demands and camping all year round - upscale standard equipment - noble interior in Scandinavian style with natural wood look - loyal companion also in winter - 7 layouts

This comeback is quite something: Since 1956, the Dethleffs Beduin has been travelling around the globe and brings his camping nomads safely, comfortably and reliably to their destination. In model year 2021 it will be back as the magnificent new flagship of the Dethleffs caravan model range. Thanks to the standard winter comfort with warm water heating and electric floor heating caravanning is possible all year round. Hence the matching addition to the name "Scandinavia", which refers not only to the all-season usability but also to the new design of the comfortable caravan in "Nordic style". Sophisticated, comfortable room concepts with unusual layouts, perfectly equipped kitchens, natural materials and a modern furniture concept ensure caravanning at its best. With its high-quality, exquisitely finished interior and its upscale standard equipment, the Beduin Scandinavia is aimed at all those who do not want to do without their personal comfort even on holiday and need plenty of room to develop. Seven layouts are available for you to choose from.

A real beauty

The full beauty of the new Beduin Scandinavia is shown above all in the tasteful and high-quality interior, which combines modern, Scandinavian design with well thought-out functionality. The interior presents itself loft-like open and with a lot of freedom of movement thanks to sophisticated room concepts.

PRESS RELEASE

The interior design is a mix of contrasts, which form an extraordinarily noble unit. Here, modern slate grey anthracite shades paired with white surfaces meet real wood look and natural materials. A composition that has its origins in northern Europe and sets the latest trend worldwide.

An atmospheric lighting concept with direct and indirect light sources provides a pleasant ambience. Three upholsteries in different colours, matching the interior, with designer curtains and a sidewall decor in natural felt look, harmoniously round off the interior design inspired by nature. Particular refinement: the handles of the overhead lockers are made of real wood.

But the Beduin Scandinavia scores in the interior not only in terms of design, details such as the extra-wide entrance door including window, high-quality 7-zone mattress made of climate-regulating material, corner headrests in the seating group, the standard warm water heating and electric floor heating are proof of its ingenious practicality and indicate year-round use. The kitchen of the flagship will make every gourmet's heart beat faster, as it not only has large drawers and a spacious refrigerator, which has a capacity of 142 or even 175 litres depending on the layout, but a so-called "full cooker" - a 3-flame cooker with the quality common in households and a practical oven - is also fitted as standard.

The modern design of the new Dethleffs series is also reflected in the exterior of the caravan. Outer skin in smooth white sheet metal, shapely trapezoidal windows, chrome manoeuvring handles and the standard drawbar cover give the caravan a modern and attractive design and make it an eye-catcher. The chic rear light carrier in Dethleffs design with integral lights also contributes to this.

Also exclusive is the comprehensive safety equipment of the comfortable caravan, which is equipped as standard with an anti-torsion clutch, high-quality brand-name tyres, a resistant GRP roof, a self-adjusting brake and a practical drawbar scale.

PRESS RELEASE

A lot of space for the perfect holiday

The Beduin Scandinavia is available in seven different layouts with body lengths ranging from 650 to 805 cm, both for couples travelling alone and for families. All models are 250 cm wide. Their technically permissible total mass in series production starts at 1,800 kg for the smallest floor plan, the **Beduin Scandinavia 540 QMK**, and ranges up to 2,200 kg for the **Beduin Scandinavia 740 BFK**. The models can be loaded up to 2.8 tons, depending on the floor plan. All but the two shortest models are tandem axles.

The floor plans of the new Beduin include familiar layouts, such as the family floor plan **Beduin Scandinavia 540 QMK** with bunk beds and bathroom in the rear, the **590 RK** with its family bedroom and the **650 RFK**, which is its master bedroom in the middle of the caravan. There are also great couple models to choose from, such as the single bed caravan **Beduin Scandinavia 650 RE** with its huge round seating area and the **690 BQT**, with its large, spacious front kitchen, which is the heart of the caravan, creates a lot of space and freedom of movement and ensures an open kitchen-living room character.

However, in the portfolio of the Beduin there are also two completely new layouts, which were not yet available in the Dethleffs model range. With these Dethleffs has set itself the target to design particularly generous, loft-like cuts. The **Beduin Scandinavia 670 BET** shines with an extremely attractive room layout, because it combines a generous, open front kitchen with single beds and a huge rear bathroom.

Both the full-width bathroom and the sleeping area with the longitudinal single beds can be conveniently separated from the living area. The largest floor plan, the **Beduin Scandinavia 740 BFK**, is also new in the Dethleffs range. It also features a kitchen in the front and a connected round seating area with an additional longitudinal bench. In the rear, there are bunk beds, in front of it the bath-

About Dethleffs

“Not without my family!” This decision taken by Arist Dethleffs in 1931 inspired him to design Germany’s first ever caravan, which he called the “Wohnauto” (original camper) – all because the ski pole and horse whip maker wanted to have his family by his side when he went on long business trips. Very few people were familiar with the word “leisure” back then; family holidays were a privilege and tourism was still in its infancy. The invention of the Dethleffs caravan marked the beginning of a new era – especially for the company, which eventually devoted itself entirely to the production of caravans, followed by motorhomes.

The pioneering spirit of Arist Dethleffs can still be felt throughout the company to this day. It can be found in the ongoing development of model ranges, in the countless innovations and, needless to say, at the heart of the Dethleffs camping story – the family. The company has had close ties with Isny im Allgäu since the very beginning and, with its position as a “Friend of the family”, has its sights firmly set on the core values of the brand.

In addition to motorhomes and caravans of the Dethleffs brand, camper vans and urban vehicles for the Pössl and Crosscamp brands are also developed and produced in Isny.
